

# COSMOPOLITAN verde1999® Italian Ceramics

Cosmopolitan is a collection of 3 refined marble colors where naturalness and a warm palette bring a powerful sense of comfort and serenity. The subtle yet well-defined veins and realistic marble details create a look that is textural and elegant. With the 12x12, 12x24 and a waterjet 8" Octagon, customers can have fun mixing sizes and colors to create a unique spaces.

Colors are intended as a guide only and may vary from actual tile. Sizes listed are nominal. Please check samples before making final selection and to get actual dimensions for layout. See reverse side for additional product information.

## Colors

VECNCA	Crema (Cream/light beige)
VECNTA	Tortora (Medium beige/light taupe)
VECNTE	Taupe (Medium taupe/light brown)

## Sizes (Rectified)

12 x 12	VECN--/1212
12 x 24	VECN--/1224
8" Octagon	VECN--/8OCT

## Mosaic

2 x 2	VECN--/22
-------	-----------

## Note about the 8" Octagon:

The Octagon's square foot calculation is the nominal square footage that just the Octagon will cover by itself. To complete the look and to cover the full area, customers also need to buy the 2x2 separately, and with the 2x2 added the coverage area will be increased

by a small amount. The 2x2 is mounted on a sheet and there are 36 pieces per sheet. For every square foot of Octagon, customers will need around 3 pieces of 2x2 (1 piece of 2x2 for each piece of Octagon). Please also note that different 2x2 from many series should work, so people can really have fun choosing the combo they want to use; just please be aware that the thicknesses of different series can vary slightly and need to be considered. The minimum recommended grout joint is 3/32".

## Product Information

Image above shows four Octagons and four 2x2 pieces - approximately 1.48 sf ft.

Tortora and Crema 12 x 12 with 2 x 2

## Trim

The surface bullnose is made from field tile that is cut, ground and reglazed.

3 x 24 Surface Bullnose	VECN--/SBN
-------------------------	------------

## Usage

Cosmopolitan is suitable for residential and light to moderate commercial applications.

## Installation Information

It is important to blend tile within each carton and from multiple cartons during installation, as well as changing the orientation of pieces with similar graphics to attain a proper mix. Most Italian manufacturers recommend a maximum offset of 8" (20 cm) on all large format tiles when setting a running bond. Please refer to ANSI requirements for setting large format tiles, ANSI A 108.2 section 4.3.8.

## TECHNICAL INFORMATION

Physical Properties	Norms	Value	Physical Properties	Norms	Value
Abrasion Resistance - PEI Rating	10545-7	PEI 4 - Taupe, Tortora PEI 5 - Crema	Slip Resistance	DIN 51130	R10
Water Absorption	10545-3	Conforms	Dynamic (DCOF) Coefficient of Friction	ANSI A137.1:2012 BOT 3000E	≥ 0.42 Wet
Frost Resistance	10545-12	Resistant			

The Dynamic Coefficient of Friction is a general guide only. Testing may vary with different production runs and with different testing labs. As noted in the American with Disabilities Act (ADA) the coefficient of friction varies considerably due to facts not under the control of entities such as the manufacturers and distributors. These factors include, but are not limited to, contaminants, slope of terrain, drainage conditions, adjacent surfaces, etc. Suitability for any installation can only be determined by a site examination of all conditions that could affect the slip resistance of the tile being installed. Continual cleaning and maintenance must be performed once the tile has been installed.
