

# Shapes

From Natucer in Spain, this high quality, extruded porcelain product is made from wet clay and has a handcrafted look and feel. The variation in size and surface texture is an inherent and desirable characteristic of this specialized production method and adds to the appeal of this tile. With a long rectangle, a classic Hexagon and the hot Chevron, available in 2 colors, Shapes offers endless design possibilities for both modern and traditional tastes.

London White (NRSHLW)

## Installation Information

Due to the extruded process that creates this handcrafted look, we recommend using at least an 1/8" grout joint. Please note that, as with handmade products, the tiles may be slightly different sizes and shapes, so you may need to adjust the size of the grout joints, making some a little bigger and some a little smaller, to accommodate these differences. This is especially true when using different shapes together in a pattern, as the edges may not align in perfectly parallel lines that will work with spacers. It is also recommended to use a grout color similar to the color of the tile and to avoid contrasting grouts. It is important to mix pieces within each carton and from several cartons to attain a proper blend. Expect variation from production run to production run, and between the different shapes/sizes.

\*As part of the intended, handmade feel of the 3 1/2 x 14, the edges are more cushioned than the other shapes. It is important to wash down the grout to reveal the cushion. Because of the cushion, the grout joint will appear bigger than the spacing between tiles, even when properly washed down.

## Technical Information

Physical Properties	Norms	Value
Water Absorption	10545-03	≤ 0,05
Frost Resistance	10545-12	Resistant
Resistance to Surface Abrasion	10545-7	London White PEI IV  Oslo Charcoal PEI II

## Usage

Shapes is suitable for walls and residential floors. The London White color may be suitable for light commercial floors. It is advisable to blend from multiple boxes during installation.
